

# TECHNOLOGY ASSESSMENT

## NCCADV & NCCASA

### CARES Act Funded Technology Assessment & Remediation Project

The North Carolina Coalition Against Domestic Violence (NCCADV), in partnership with the North Carolina Coalition Against Sexual Assault (NCCASA), received CARES Act funding to facilitate technology audits and assessments for more than 30 nonprofit member agencies across North Carolina. The project would support agencies in assessing and upgrading their technology infrastructure, allowing these agencies to provide services to survivors of domestic violence and sexual assault more effectively.

The project required timely and collaborative coordination between NCCADV, NCCASA, the technology firm conducting the technology audits, and member agencies, as well as facilitation of the purchasing and installation of recommended technology upgrades. Project success hinged on effective communication, an efficient purchasing and installation strategy, and compliance with strict funding-use deadlines.

Yazdani Consulting & Facilitation provided project management to support this project.

#### Solutions

- Project Planning, including developing a Communications Plan, and a Remediation & Purchasing Plan (with budget allocations)
- Project Execution, including acting as a liaison between member agencies, the tech firm, and other vendors
- Project Monitoring, including tracking purchases and installations
- Project Closing, including creating a final project report suitable for auditing

#### Outcomes

- In under 2 months and with a December 30 funding deadline, technology audits were completed for 31 member agencies, and technology purchases and installations were completed for 34 member agencies
- Over \$950,000 was spent to support technology upgrades
- Member agencies rated their experience participating in the project positively

#### Feedback

We could not have done this without you!

Thanks so much for all you've done on this project - you rocked it!
